J. Mol. Biol. 291:393-415(1999).

-!- FUNCTION: THE PROTEIN IS A COMPONENT OF THE OLIGOPEPTIDE PERKEASE, A BINDING PROTEIN-DEPENDENT TRANSPORT SYSTEM, IT BINDS PEPTIDES UP TO FIVE AMINO ACIDS LONG WITH HIGH AFFINITY.

-!- SUBCELLULAR LOCATION: Periplasmic.
-!- SIMILARITY: BELONGS TO THE BACTERIAL EXTRACELLULAR SOLUTE-BINDING PROTEIN FAMILY 5.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  PERIPLASMIC OLIGOPEPTIDE-BINDING PROTEIN.

-! FUNCTION: INVOLVED IN A NICKEL TRANSPORT SYSTEM, PROBABLY
REPRESENTS THE NICKEL BINDER.
-! SUBCELLOLAR LOCATION: Periplesmic (Probable).
-! SUBCELLOLAR LOCATION: Periplesmic (Probable).
-! SIMILARITY: BELONGS TO THE BACTERIAL EXTRACELLULAR SOLUTE-BINDING

Patent No. 5869720
GENERAL INFORMATION:
APPLICANT: John, Maliyakal E.
TITLE OF INVENTION: TRANSGENIC COTTON PLANTS
TITLE OF INVENTION: PRODUCING HETEROLOGOUS PEROXIDASE
CORRESPONDENCE ADDRESS:
                                                                                                                COMPUTER REABABLE FORM:
MEDIUM TYPE: Floppy disk
COMPUTER: IBM PC compatible
COMPUTER: PREDICTEM: PC-DOS/MS-DOS
SOFTWARE: Patentin Release #1.0, Version #1.25
CURRENT APPLICATION DATA:
APPLICATION NUMBER: US/08/378,588
                                                                                                                                                                                                               APPLICATION:
FILING DATE:
CLASSIFICATION:
ROASSIFICATION:
NAME: Seay, Nicholas J.
REGISTRATION NUMBER: 27,386
REFERENCE/DOCKET NUMBER: 11-29-9101-2
FELEPHONE: 6608 251-2484
FELEPHONE: (608) 251-2484
FELEPHONE: (608) 251-2166
INFORMATION FOR SEQ ID NO: 5:
SEQUENCE CHARACTERISTICS:
LENGTH: 307 base pairs
TYPE: nucleic acid
STRANDEDNESS: double
TOWNED: DNA (genomic)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                ADDRESSEE: Nicholas J. For further information please see http://www.fruitfly.org The BDGP Drosophila melanogaster BAC library was prepared by Kazutoyo Osoegawa and Arron Mammoser in Pieter de Jong's Laboratory in the Department of Cancer Genetics at the Roswell Park Cancer Institute in Buffalo, NY. The library is named RPCI-98 and was constructed by partial Ecost digestion of Drosophila DNA provided by the BDGP from the isogenic strain y2; on bw sp, the same strain used for the BDGP's pl and EGY libraries. A more detailed description of the library and how to order individual BAC clones, the entire library and how to order individual BAC clones, the entire library and how to order individual Ency Cones, the entire library or filters for hybridization from the BACPAC Resource Center can be found at http://Dacpac.med.buffalo.edu/drosophila_bac.htm.
